

HabitTracker

Small steps. Honest progress.

A complete dark-mode UX handoff for the screens discussed so far: onboarding, authentication, habit creation, good and bad habit tracking, smoking cost summaries, partner support and Health Connect concepts.

DOCUMENT STATUS

UX Blueprint v1.0

Current MVP and future concepts are explicitly separated.

21 screen specifications - 26 total pages

Scope, principles and release boundary

MVP NOW

- Welcome and authentication
- Today and Habit navigation
- Good and quit habit creation
- Microtasks, schedules and reminders
- Smoking quantity and cost tracking
- Progress and 10 PM summary

FUTURE MODULES

- Recurring tasks and one-time tasks
- Finance, meditation, growth and career
- Partner/supporter sharing
- Health Connect and wearable data
- Broader multilingual release

NON-NEGOTIABLE UX

- On-screen back action on every subpage
- System back behaves consistently
- New habits update totals immediately
- Supportive language after setbacks
- Explicit consent for shared or health data
- System-controlled light and dark mode

Primary user flow

Future branches from Settings: Connect supporter and Health Connect. Both remain optional and permission-led.

Comforting pink-red dark theme

ACCESSIBILITY AND BEHAVIOR

- Use pink-red for emphasis, not as the only status signal.
- Follow system dark/light mode. Dark mode is the design reference.
- Minimum touch target 48 dp; strong text contrast; scalable type.
- Animation remains subtle and respects Reduce Motion.

Welcome

PURPOSE

Create emotional clarity and communicate the app's promise before asking for account details.

KEY UI

- Subtle animated habit mark using the pink-red accent gradient.
- One primary action: Get started.
- Secondary route for returning users: Log in.

MOTION

Slow pulse and gentle arc movement. Respect the device Reduce Motion setting.

NAVIGATION

Get started -> Login / Sign up. Log in -> Login.

SCREEN 02 / MVP

Login

PURPOSE

Let returning users authenticate with minimum friction.

INPUTS

- Username or email.
- Password with visibility toggle.
- Forgot password recovery route.

ALTERNATIVES

Google, Facebook and X are visible as secondary sign-in choices.

VALIDATION

Keep errors next to the affected field and preserve the entered username.

NAVIGATION

Back -> Welcome. Success -> Today dashboard.

Email sign up

PURPOSE

Create an account using an email address when a social account is not preferred.

INPUTS

- Display name.
- Email address.
- Password with clear minimum requirement.

TRUST

Show Terms and Privacy links before account creation.

NAVIGATION

Back -> Login. Success -> Today dashboard or onboarding.

The mockup shows a mobile app interface for creating an account. At the top, the status bar displays '9:41' and '5G 92%'. The screen title is 'Create account' with a back arrow. Below the title is a subtitle 'Begin with one honest habit.' The form consists of three input fields: 'NAME' with the placeholder 'Your name', 'EMAIL ADDRESS' with the placeholder 'you@example.com', and 'PASSWORD' with a masked password '*****' and a 'SHOW' toggle. A note 'At least 8 characters' is visible below the password field. A large blue button labeled 'Create account' is at the bottom. Below the button is a disclaimer: 'By continuing, you agree to the Terms and Privacy Policy.'

Today dashboard

PURPOSE

Answer three questions immediately: What should I do, how am I doing, and what is next?

DYNAMIC STATE

- The total habit count comes from stored habits, never static text.
- Creating or deleting a habit updates the count immediately.
- Progress reflects today's completed check-ins.

ACTIONS

Tap a card for details; use + to add an activity; use bottom navigation for core areas.

TOPE

Supportive after both progress and setbacks. Avoid shame-based language.

Add an activity

PURPOSE

Provide the planned activity model without pretending unfinished modules are available.

ACTIVITY TYPES

- Habit - enabled in the first release.
- Recurring task - planned.
- Task - planned.

NAVIGATION

Back -> Today or Habits. Habit -> Categories.

Habit categories

PURPOSE

Let users start from their intention rather than a complex configuration form.

INITIAL SCOPE

- Quit a bad habit.
- Build a good habit.

FUTURE CATEGORIES

Finance, Study, Meditation, Personal growth and Career remain visible only if clearly marked as coming later.

NAVIGATION

Every page has an on-screen back button; Android system back follows the same destination.

Good habit templates

PURPOSE

Offer useful starting points while always allowing a custom habit.

EXAMPLES

- Water, reading, movement, study and mindfulness.
- Every template remains editable before creation.

NAVIGATION

Template or Custom -> Habit basics.

Quit habit templates

PURPOSE

Help users name difficult behavior without judgment.

EXAMPLES

- Smoking cigarettes.
- Drinking alcohol.
- Chewing tobacco or pan masala, such as Rajnigandha.
- Reduced scrolling and custom habits.

LANGUAGE

Use factual labels and allow renaming. Never diagnose addiction.

NAVIGATION

Template or Custom -> Habit basics or specialized setup.

Habit basics

PURPOSE

Capture the smallest useful definition of a habit.

FIELDS

- Habit name.
- Tracking method: check-in or count/amount.
- Target and unit.
- Personal reason, optional.

VALIDATION

Name, positive target and unit are required when amount tracking is selected.

NAVIGATION

Back preserves draft. Continue -> Schedule.

← Make it achievable

New habit - Step 1 of 3

HABIT NAME

Read every day

HOW WILL YOU TRACK IT?

Count or amount v

DAILY TARGET

10 minutes

YOUR REASON (OPTIONAL)

Prepare calmly for my goals

Continue

Schedule and reminders

PURPOSE

Define when the habit applies and whether the app should remind the user.

FREQUENCY

- Daily, selected weekdays, weekly, monthly or a custom recurrence.
- At least one applicable day or recurrence is required.

NOTIFICATIONS

Permission is requested only when the user enables a reminder, with a plain explanation.

NAVIGATION

Back preserves draft. Continue -> Microtasks and review.

The screen is titled 'Find your rhythm' with a back arrow and subtitle 'New habit - Step 2 of 3'. It features a status bar at the top with '9:41' and '5G 92%'. The main content area includes a 'REPEAT ON' section with seven circular day selectors (M, T, W, T, F, S, S), where the first five are filled and the last two are outlined. Below this is a 'FREQUENCY' section with a dropdown menu showing 'Weekly - weekdays' and a 'v' icon. The 'REMINDER TIME' section has a dropdown menu showing '8:30 PM'. A 'Reminder' section is highlighted with a red border, containing the text 'On - gentle notification' and 'Can be changed or disabled anytime'. At the bottom is a large red 'Continue' button.

REMINDER TIME

8:30 PM

Reminder

On - gentle notification
Can be changed or disabled anytime

Continue

Microtasks and review

PURPOSE

Break a difficult habit into actions small enough to begin, then confirm the setup.

BEHAVIOR

- Microtasks are optional and editable.
- Quit habits can use alternative actions for urges.
- A final summary prevents accidental configuration.

AFTER SAVE

Return to Today and show the new habit immediately. Update total habit count.

Good habit tracker

PURPOSE

Record daily progress without forcing an all-or-nothing check-in.

ACTIONS

- Increment the amount.
- Complete microtasks.
- Save a short reflection.
- Edit the habit from this page.

STATE

Progress persists locally and updates the dashboard immediately.

NAVIGATION

Back -> previous page or Habits list; bottom navigation remains predictable.

Smoking habit setup

PURPOSE

Configure the specialized data needed for meaningful smoking progress and financial summaries.

FIELDS

- Frequency: daily, weekly, monthly or recurring.
- Baseline amount.
- Price per cigarette, e.g. Rs 20 per stick.
- Reduction or zero-use goal.
- 10 PM summary time.

VALIDATION

Quantity cannot be negative; cost must be zero or greater; currency follows locale.

Quit habit setup

HABIT FREQUENCY

Daily v

BASELINE QUANTITY

5 sticks per day

PRICE PER ITEM

Rs 20 per stick

GOAL

Reduce, then reach zero v

NIGHT SUMMARY

10:00 PM

Continue

Smoking daily tracker

PURPOSE

Make logging a cigarette fast while keeping the result honest and compassionate.

COUNTER

- + increments by one; - corrects mistakes.
- Today's cost is quantity x price per item.
- Zero-use check-in is prominent but never overwrites logged quantity silently.

SUPPORT

Show urge microtasks and an optional supporter action. A setback does not erase earlier progress.

Habit list

PURPOSE

Provide the main habit-management page and a reliable route back after creating or editing a habit.

DYNAMIC BEHAVIOR

- Total count comes from the database.
- New habits appear immediately.
- Editing, pausing or deleting updates every dependent summary.

NAVIGATION

Each item -> Habit detail. Add -> Add activity. Bottom navigation -> core areas.

Progress

PURPOSE

Turn repeated check-ins into understandable evidence of change.

METRICS

- Completion rate and weekly trend.
- Smoke-free days and estimated savings.
- Good-habit minutes, amounts and streaks.

INTEGRITY

A skipped day and a setback are different states; neither should be disguised as completion.

10 PM smoking summary

PURPOSE

Deliver the requested nightly comparison and financial impact after 10 PM.

STATES

- Less: show the reduction clearly.
- Equal: state that the amount is unchanged.
- More: report the increase without shaming.
- Zero: celebrate a smoke-free day and Rs 0 spent.

COMPARISON

Default to yesterday and the configured baseline; label which comparison is being shown.

NOTIFICATION

The push notification contains a short summary; tapping opens this full page.

Connect a supporter

PURPOSE

Allow the user to share selected progress with a spouse or trusted person for encouragement.

PRIVACY DEFAULTS

- Explicit opt-in by the habit owner.
- Choose individual habits and summary fields.
- Daily summaries rather than raw logs by default.
- Pause or revoke access at any time.

PERMISSIONS

A supporter can view and encourage; they cannot edit habits or health records.

Supporter progress view

PURPOSE

Show a partner enough progress to encourage, without turning support into surveillance.

EXAMPLE

Study progress can support a spouse preparing for Loksewa, while personal reflections stay private.

ACTIONS

- Send a predefined or personal encouragement.
- Respect quiet hours.
- No public ranking or punishment mechanics.

Health Connect

PURPOSE

Optionally use user-approved smartwatch and fitness-band data through Health Connect.

POTENTIAL INPUTS

- Steps for walking goals.
- Exercise sessions for activity habits.
- Sleep for sleep routines.
- Heart-rate trends only where appropriate.

CONSENT

Request only selected data types, explain the benefit, and work normally when permission is denied.

BOUNDARY

Habit insights are wellness features, not medical diagnosis or treatment.

Settings and privacy

PURPOSE

Centralize preferences, data permissions and account controls.

APPEARANCE

Follow the device theme by default. This blueprint shows dark mode; light mode uses the same hierarchy and pink-red accents.

LOCALIZATION

All user-facing strings must be externalized for future Nepali, Hindi, Chinese, Japanese, Arabic, European and Russian-language support.

DATA

Include export, account deletion, sharing status and connected-data permissions.

Recommended Android build order

01

Foundation

Theme tokens, navigation shell, data models and local persistence.

02

Onboarding

Welcome, login and email sign-up UI with system back behavior.

03

Habit creation

Categories, templates, basics, schedule, reminders and microtasks.

04

Daily tracking

Today, habit list, good-habit detail and smoking counter/cost.

05

Feedback

Progress history, streaks and the 10 PM smoking summary.

06

Future services

Partner sharing, account sync and Health Connect after the local MVP is stable.

ACCEPTANCE RULE

A feature is complete only when it persists after restart, updates all affected totals, supports both on-screen and Android system back navigation, and has been tested on the emulator.
